Modeano’s Ribolla Gialla

scritto da Wine Meridian Editorial Staff | 13 Dicembre 2022

Modeano is located in the region of Friuli-Venezia Giulia, known for the quality of its wines. Its diverse areas of production allow this terrior to show different characteristics and obtain products of absolute excellence showing a range of personalities. Modeano’s vineyards are planted in what is known as the Friuli Riviera, tempered by sea breezes. The vines are low in productivity, planted to well drained clay soils rich in minerals that can be traced back to the ice age. Ribolla Gialla is local grape variety from Friuli, with bright straw yellow colour with light greenish reflections. It presents the typical aromas fruity aromas which mingle with a saline minerality that adds to its attractive complexity. It has a definite unique character and presence with a long fresh savory finish. It pairs very well to raw fish, shellfish and bolder fish dishes as well as white meats.
