

# Azienda Agricola Accordini Stefano awarded at the Mondial des Vins Extrêmes wine competition

scritto da Redazione Wine Meridian | 1 Dicembre 2018

## Azienda Agricola Accordini: let's know the winery

From 2011 the Azienda Agricola Accordini Stefano has been placed its wine production into the height of the Valpolicella Classica area, a move made with the goal to allow the production of wines of excellent quality. The choice to produce wines in the hills and more precisely in Cavalo of Fumane, small village placed into the nature at 550 meters above the sea level, proved a winner. The wines, thanks to the particular climatic conditions and the soil quality of this

area, have characteristics, which are unique and unmistakable, and for these reasons still today they claim a good success in every part of the world reached by the Accordini family. Every day the company works 25 hectares of vineyard in the highest region of the Valpolicella Classica district, which means the wines can be defined as the production of “mountain” wine and the Winery has known as the highest one in the zone.

### **The Mondial des Vins Extrêmes wine competition**

All these details in the production allowed the Accordini family to take part in the famous competition organized by Cervim and to win the prestigious gold medal with the Valpolicella Classico Superiore Ripasso DOC Acinatico 2016. This wine is intense ruby red and the very broad bouquet presents a marriage of both fresh and refined notes of mature fruits, spices and tobacco. The taste is full, strong and is perfectly combined with soft tannins.

The Mondial des Vins Extrêmes wine competition, organised by Cervim, is the only international wine competition specifically for wine produced in heroic vine-growing areas. The competition selects the best wines from extreme viticulture with the aim of promoting and safeguarding the produce from small vine-growing areas having their own distinctive history, traditions and uniqueness; areas with high environmental and landscape value, mostly cultivating local vine varieties. Tasters, chosen among oenologists, expert wine tasters and specialized press journalists from all over the world, will convene in special panels, each consisting of 5 tasters, which judge the various wines with a special computer program used for the very first time in Italy at the Cervim competition.
